

SOFTCLOSER **SOLID CENTRO** index number:1691

We constantly search for new solutions, in order to increase the comfort of using our systems. We want you meet the needs of our clients, and that is why we present another novelty into our offer – the CENTRO softcloser.

It is mounted in the central part of the upper rail. Its task is to position and close the middle and external door wing. Owing to the position of the softcloser in the track, the door will always stop in the desired place and ensure the aesthetic aspect of the furnishing. What is more important, the softcloser is passable and works on both sides of the furnishing (closing the door on the right and left side of the furnishing).

The softcloser can be used in every upper track offered by Laguna (Universal, Solid, Gama).
