# A DIALOGUE ABOUT AMBIANCE.

LED light in furniture and furnishings.  
The effective extension of the room light.

Light is a fundamental part of life. One, that affects our well-being noticeably. The bright, cool white morning light is very different from the warm glow of candles or light bulbs. Inside, one tries to mimic daylight in an effort to design the room with it. Light in furniture and furnishings blends harmoniously with the lighting of the room adding another layer to the design – a fourth dimension. This way, subtle nuances in the ambiance are created and specific areas are separated or accentuated to create a perfectly composed holistic effect.

Due to the low heat development, the small fixture size and the long service life LED lights are ideally suited for this purpose. Light colours, even differently tempered whites, are recreated realistically. With the Loox LED system work areas, presentation areas and living rooms can be illuminated for functional and decorative purposes. Well-being can be influenced in a targeted manner. And it is surprisingly simple.

## Light – Engineered by Häfele

Häfele combines the knowledge of the essence of light and its high product development competence with the on-going analysis of international markets. On this basis, the high-quality Loox LED system was developed to effectively combine the needs of customers and installers.

# A SYSTEM THAT SIMPLIFIES DESIGNING.

Loox. Light ideas that are flexible, easy and reliable to implement.

With the Loox LED system it is easy to develop and plan flexible light ideas. The flexibility is a result of a wide selection of different components ranging from light fixtures to switches. The easy to use plug-in system with its clearly marked colour coding connects all the elements with a compact driver. Large systems with multiple or different drivers can also be created. All components are of certified quality and provide long-term reliability and peace of mind during operation.

FLEXIBLE

EASY

RELIABLE

# PLAN FLEXIBLY.

Loox. The comprehensive kit of light and functions.

To achieve different lighting effects is one thing. To respond to different installation situations, is something else altogether. With the large number of components in the Loox LED system both are possible. From the wide-angle beam of interior cabinet lighting incorporating a door contact switch combined with drawer lighting, to the combination of mood and functional lighting in an open kitchen.

# EASY AND QUICK INSTALLATION.

Loox. The intelligent plug and play system with easily understandable colour coding.

12 V

24 V

350 mA

## PLUG AND PLAY.

Loox has 3 power systems for the different LED lights with matching drivers as central switching devices. 12 V and 24 V (parallel connection) for universal applications ranging from ambient light to functional light with different light outputs and 350 mA (series connection) specially for spot lighting with low wattage.

Clear colour coding of the plugs with individual design makes the system easy to assemble and install. It can easily be installed without the need for an electrician.

# ENSURING CUSTOMER SATISFACTION.

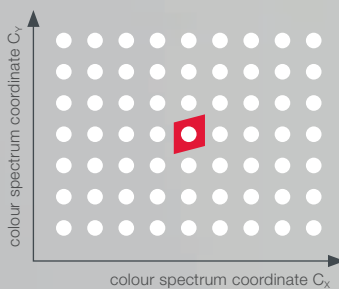

Loox. Consistently high quality level with certified Häfele standards.

## Consistent colour quality and performance.

An important factor for new technologies is the reliability in use. Häfele has therefore set high standards for the selection of materials, which are continually tested and certified internationally. Setting a narrow binning is one of them. LEDs are tested and sorted for colour, luminous flux and forward voltage after production. Häfele selects

the highest quality class LEDs for maximum durability, energy efficiency and to ensure aftermarket replacement quality. Häfele has an extensive list of quality criteria in order to ensure reliable products and long-term customer satisfaction.

## Häfele Binning

Close selection criteria ensure quality.

# TO SEE, OBSERVE OR WATCH?

Designing with light functions.

In the 1950s, Richard Kelly, a pioneer of lighting design, already differentiated between light to see – ambient luminescence, focal glow – the illumination of an object or area, and play of brilliants – in which the light itself is the object to observe.

## Emphasising room dimensions.

The Loox LED system also makes other, more specific, functions to use light as a design element in furniture and therefore also in the room, possible. Task lighting describes lighting, which is used to illuminate a work area in a kitchen, or the bathroom countertop. Ambient lighting balances room dimensions and facilitates spatial orientation. The narrow beam of spot lighting is used to highlight interesting objects or features.

The versatility of applications and combinations of lights within the Loox LED system create the opportunity to emphasize the dimensions of rooms and lend an ambiance to furniture that provides a holistic connection with the room.

Task light

Ambient light

Task light

Spotlight

# INVIGORATING OR RELAXING.

Designing with colour temperature.

Light with a high blue component has an invigorating effect on the body. Just like the cool fresh light of an early morning. By comparison, strong red and yellow-coloured light has a relaxing effect and evokes a state of rest. Just like the warm glow in the late afternoon or a candle.

## Knowledge creates opportunities.

The colour of the light, also referred to as colour temperature (measured in K = Kelvin), controls our state of well-being. Using Loox LED lights, you can deploy this effect in a targeted manner. Loox LED lights are available in colour temperatures ranging from 2700-6500 K. Cool white light is ideal for task lighting while ambient lighting for settings should be a warm white light.

The use of multi-white lights integrates open kitchens into the living environment. In the morning, bright and invigorating cool light illuminates the work surface; in the afternoon the light is warmer and in the evening it is dimmed to a warm white for a relaxing ambiance. The transition is stepless and remote controlled.

RGB lights can be supplemented to add intense light colours for individually adjustable decorative effects.

# MANY OPTIONS. LOW COST.

Loox. The LED lighting system. Light – Engineered by Häfele.

The intelligent drivers represent the core of the Loox system. Not only do they provide different numbers of lights with the power that is required, but they are also suitable for the different voltages and frequencies all over the world, recognise different types of switch, can be used for dimming and can be combined in many different ways. International testing and certification make the use thereof extremely safe and easy.

All of the system components are described in detail on the pages that follow. Please also ask for the Loox 'Quick Select', which contains a wide range of application examples and wiring diagrams.

12 V      24 V      350 mA

## SYSTEM

Coordinated components turn Loox into an atmospheric LED system for almost any application. From simple to complex: plug and play. Flexible planning, easy to install, always reliable and peace of mind during operation.

## MODULARITY

The lights and switches are cabled so that they can be connected to the driver at both sides. This means that a switch can be replaced with a dimmer at a later date without having to re-lay the cable. Different covers give recess mounted lights and surface mounted downlights a different look.

12 V      24 V      350 mA

### LIGHT INTENSITY

12 V system: Mainly used for ambient and mood light. 24 V system: Mainly used for functional light because of the higher light intensity. 350 mA system: Mainly used as a spotlight because of the high light intensity.

### CONTROL

Switch and control – suitable for any requirement. Different cable-connected switches, continuously adjustable remote controllers for light colours and temperatures, and radio switches that are completely independent of the location create new freedom in furniture planning.

# LOOX LED 2025/2026

RECESS MOUNTED LIGHT/SURFACE MOUNTED DOWNLIGHT, MODULAR 

12 V SYSTEM

Thanks to the modular principle with the differently designed rings for recess mounting/bezels and leads in different lengths, these lights can be used in a variety of applications. The drill hole diameter of 58 mm is ideal for replacing existing halogen lights. The powerful illuminance of the LED 2025 also allows the use in working areas. Customised lights can be developed extremely quickly – just speak to us.

# LOOX LED 2030

LED SILICONE STRIP LIGHT, 5 m, 300 LEDs

12 V SYSTEM

The LED 2030 silicone strip light makes it possible to create efficient, flexible and atmospheric background lighting for furniture and furnishings. Thanks to the silicone encapsulation, this strip light can also be used without an aluminium profile, and it can even be used to create radii. The silicone strip light has 300 LEDs, can be shortened every 50 mm and is also ideal for retrofitting. The cut silicone strip can be re-used using the relevant clip and corner connectors.

- > Dimmable
- > The cut silicone strip can be re-used

# LOOX RGB COLOUR MIXING

## RGB COLOUR MIXER WITH REMOTE CONTROL

RGB is the abbreviation for red, green and blue. With the principle of additive colour mixing, almost any colour combination can be created from the 3 primary colours.

A light with RGB capability either has 3 LEDs for the primary colours, which are arranged close to each other and generate the mixed colour together, or 3 different semiconductor crystals are installed in one LED, each of which radiates one of the primary colours.

Because the 3 primary colours are mixed with RGB, a pure white light colour is not possible.

A control unit (the RGB colour mixer) is required to make the different colour settings.

The RGB colour mixer is installed between the Loox driver and the lights.

Up to 4 RGB lights can be connected to a colour mixer.

With the aid of the RGB distributor, up to 12 RGB lights can be connected to one colour mixer.

The colour mixture that is selected applies to all of the connected RGB lights.

The RGB colour mixer is controlled by a remote control, via which the colour can be continuously adjusted and can be changed at any time.

This can be used to generate attractive colour displays, which can also be created by the interaction between the light that has been selected and the illuminated furniture.

# LOOX LED 2010

SURFACE MOUNTED DOWNLIGHT, SQUARE, RGB

12 V SYSTEM

The LED 2010 is the right choice if you wish to create design emphasis in a small amount of space with a surface mounted downlight with changing colours. The lights require very little space. The light colour thereof can be set to the customers' wishes.

- > Dimmable via RGB colour mixer with remote control.
- > max. 10 colour mixers can be controlled with 1 remote control

# LOOX LED 2012

LED SILICONE STRIP LIGHT, 2 m, 72 RGB LEDs

 RGB 

12 V SYSTEM

Furniture is put into the right light by means of individually selectable colours using the LED 2012 colour changing strip light. The strip light can be shortened and flexibly adapted to any furnishing. It is therefore ideal for retrofitting.

- > Dimmable via RGB colour mixer with remote control.
- > max. 10 colour mixers can be controlled with 1 remote control
- > Can be shortened every 75 mm (Cat. No. 833.73.320) or every 83.3 mm (Cat. No. 833.73.322), after every 3<sup>rd</sup> LED
- > Installation: Self-adhesive
- > Single colour LEDs

> Driver see page 64

Cat. No.	833.73.320	833.73.322
Colour temperature (K)	RGB	RGB
Length (mm)	300	2000
Width (mm)	10	10
Height (mm)	2.5	2.5
Wattage (W)	2	12
Number of LEDs	12	72
Finish	Plastic, white	
Supplied with	1 LED strip light

## LED 2012 flexible strip light

- > Remote control for RGB colour mixer  
Cat. No. 833.74.708

- > RGB colour mixer, white, with 4-way distributor, max. 30 W  
Power consumption 0.6 W  
Cat. No. 833.74.802

- > 9-way RGB distributor with 1 m lead  
Cat. No. 833.74.741

- > 2.5 m RGB lead (connection of LED strip lights to RGB colour mixer)  
Cat. No. 833.74.711

- RGB interconnecting cable (e.g. for corner connection)
- > 50 mm Cat. No. 833.74.710
- > 500 mm Cat. No. 833.74.762
- > 1000 mm Cat. No. 833.74.777

# LOOX LED 2034/2035

FLEXIBLE LIGHT WITH USB CHARGING STATION

## 12 V SYSTEM

The LED 2034 flexible light does not just provide targeted spotlighting, but also makes it possible to charge a smartphone and/or a tablet because of the two integrated USB ports. The push switch that is integrated in the base makes it possible to have two brightness levels – 100 % and 50 %. An extremely good light with additional uses that can be used in home offices and bedrooms alike. If you are looking for a flexible light without a USB charging station, the LED 2035 is the right solution.

- > Dimmable
- > Integrated push switch
- > Installation: Surface mounted

- > Driver see page 64
- > LED 2034: In order to make optimum use of the USB charging station, a driver with at least 20 W must be used
- > LED 2034: USB charging station  
Output voltage 5 V  
Output current 2 x 1 A

## FLEXIBLE LIGHT

### 12 V SYSTEM

The flexible LED 2018 reading light can be conveniently positioned. The integrated glass lens provides a pleasant, homogeneous cone of light. The light can be switched on and off by rotating the head of the light.

- > Cannot be dimmed
- > With integrated rotary switch on light head
- > Installation: Surface mounted or recess mounted

> Driver see page 64

Cat. No.	833.74.100	833.74.110

# LOOX LED 2019

GLASS EDGE LIGHT WITH VISIBLE LIGHT POINTS

12 V SYSTEM

The LED 2019 opens up a wide range of possible uses. Glass panels between 6 and 12 mm thick can be used with this light.

- 
  - > Dimmable
  - > Without load bearing function!
  - > Is pushed onto the glass shelf from the rear
  - > Glass thickness 6–12 mm
-  
  - > Driver see page 64

Also pay attention to the glass edge profile on page 115. You can create your glass edge lighting yourself using this.

RECESS/SURFACE MOUNTED DOWNLIGHT, ROUND SURFACE AREA LIGHT 

24 V SYSTEM

LED 3022 and LED 3023 impress with their simple elegance and homogeneous light output. They can be used universally because of their slimline appearance and round design. Combined with their extremely flat design, they make creative application solutions possible as recess mounted lights or surface mounted downlights.

# LOOX LED 3021

SURFACE MOUNTED LIGHT, BAR-SHAPED, IP44

24 V SYSTEM

The high-quality LED 3021 surface mounted light is ideal for use in bathrooms (degree of protection IP44). The light output on three sides of the rectangular cover provides extremely powerful luminance. It is available in different lengths and adapts itself perfectly to your furniture.

# LOOX LED 3028

LED STRIP LIGHT, TWO ROWS, 5 m, 1200 LEDs

24 V SYSTEM

The LED 3028 two-row strip light provides an outstanding light yield and is therefore ideal for putting the emphasis on even small details. The strip light can be used universally by means of four different colour temperatures and the individually adaptable length.

- > Dimmable
- > Can be shortened every 25 mm
- > Installation: Self-adhesive
- > max. 2.5 m LED strip (60 W) can be connected to an output of the 75W driver
- > Installation only with aluminium profile
- > All aluminium profile are suitable except 833.74.840, 833.74.813 and 833.74.814

- > Driver see page 92
- > Aluminium profile see page 110

# LOOX LED 4005

0 100% RECESS MOUNTED LIGHT/SURFACE MOUNTED DOWNLIGHT, ROUND WITH LENS

350 mA SYSTEM

The LED 4005 can be used as a recess mounted or surface mounted light. The extremely small and flat design makes the light easy to integrate in the furniture design. The integrated lens also centres and intensifies the light spot.

- > Dimmable
- > Bezel for surface mounting supplied
- > 3-piece set
- > Drill hole Ø: 28 mm

> Driver see page 106

<b>Cat. No.</b>	<b>833.78.100</b>

# LOOX LED 4010

MODULAR SURFACE MOUNTED STACK LIGHT

350 mA SYSTEM

The LED 4010 can be individually adapted to requirements thanks to its modular configuration with rotary and swivelling LED modules and the special design. The basic set can be optionally extended.

- > Dimmable
- > 1 Light can be extended to max. 8 LED modules and 4 spacers

- > LED module  
Length: 72.5 mm; Wattage: 1 W  
Cat. No. 833.80.011

- > Spacer, length: 72.5 mm

# LOOX LED DRIVER

CONSTANT CURRENT 350 mA

**350 mA SYSTEM**

Series connection

-  > Cat. No. 833.80.900  
 $\otimes_1 + \otimes_2 + \dots + \otimes_n$  1 W up to max. 4 W
- > Cat. No. 833.80.901  
 $\otimes_1 + \otimes_2 + \dots + \otimes_n$  5 W up to max. 10 W
-  > Cable bridge (replacement)  
 Cat. No. 833.80.720

The driver is the heart of the Loox system, and is suitable for connecting to all of the worlds most frequently used mains voltages and frequencies. All of the switches in the Loox product range can be connected to the drivers (see pages 112–115).

-  > At least 2 Watts have to be connected to the light output, when using a Loox switch.
- > Lead length from driver to switch max. 6 m.
- > All lights and switches must be connected to the driver first, before connecting the driver to the mains.  
 Any unused slot must have a bridge. Bridge connectors are supplied.

# LOOX LED 9003

BATTERY-OPERATED LIGHT, ROUND, WITH SENSOR

Niches can be brightly illuminated with the rechargeable LED 9003 battery-operated light with integrated motion detector.

- > The light can be recharged using the supplied mini-USB cable
- > With integrated motion detector (120° detection range up to 2 m and 30 seconds delay time)

Cat. No.	833.87.012
Colour temperature (K)	6500 (daylight white)
Ø (mm)	100
Height (mm)	17
Wattage (W)	0.6
Number of LEDs	3
Light output (lm)	30
Efficacy (lm/W)	50
Colour rendering index (CRI)	80
Service life (h)	10
Charging time (h)	3–4
Finish	Plastic, silver coloured
Supplied with	1 light with magnetic mounting plate and 0.8 m mini-USB charging cable

# LOOX LED 9004

BATTERY-OPERATED LIGHT, SQUARE, WITH SENSOR

## BATTERY-OPERATED LIGHT

Storage spaces and dark corners are ideally illuminated with the LED 9004 battery-operated light. The integrated motion detector makes it possible to activate the light in any application.

- > The light can be recharged using the supplied mini-USB cable
- > With integrated motion detector (120° detection range up to 2 m and 30 seconds delay time)

Cat. No.	833.87.013
Colour temperature (K)	6500 (daylight white)
Length (mm)	120
Width (mm)	65
Height (mm)	17
Wattage (W)	0.8
Number of LEDs	8
Light output (lm)	55
Efficacy (lm/W)	69
Colour rendering index (CRI)	80

# LOOX LED 9005

BATTERY-OPERATED LIGHT, BAR-SHAPED, WITH SENSOR

The LED 9005 battery-operated light is perfect for illuminating drawers, storage spaces and recesses.

- > The light can be recharged using the supplied micro-USB cable
- > The light is pushed onto the mounting plate
- > With automatic shut-off
- > Selectable switching function:
  1. Door sensor switch (factory setting):  
Door open, light on – door closed, light off.  
Energy-saving mode after 30 seconds:  
LED flashes 2 to 3 times and then turns off.
  2. Sensor switch:  
Active on/off switching

# LOOX ALUMINIUM PROFILES

## FOR LED FLEXIBLE STRIP LIGHTS

### Profile cover finishes – different light effects

Milky

Frosted

#### Milky cover:

The material is dyed. Creates a homogeneous surface-directed light with uniform intensity. The light appears “soft”.

#### Frosted cover:

The surface is frosted. The light appears “velvet-white” and creates a sophisticated, high-quality impression.

### Profile for surface mounting

- > Note the dimensions of the clip connector
- > Not suitable for operation with LED 3028.
- > LED 3013 and LED 3015 not rated for continuous duty (≥8 hours/day)

- > End cap plastic, silver coloured, 2 pieces  
Cat. No. 833.74.849

# LOOX ALUMINIUM PROFILES

## COOLING BAR AND SWITCHES

### Aluminium profile dimmer 12 V/24 V

Cat. No.	833.89.085	833.89.103
For system	12 V	24 V
Finish	Plastic, silver coloured anodized	
Length (mm)	36	36
Width (mm)	16	16
Height (mm)	7.5	7.5
Application	For press fitting	
Supplied with	1 dimmer with 2 m lead	

- ! > For Loox 12 and 24 V LED strip lights with 10 mm width in Loox aluminium profiles with 16 mm internal dimension
- > Soft on/off with dimming function

### Aluminium profile motion detector 12 V/24 V

Cat. No.	833.89.084	833.89.101
For system	12 V	24 V
Finish	Plastic, silver coloured anodized	
Length (mm)	36	36
Width (mm)	16	16
Height (mm)	14.5	14.5
Delay time (seconds)	30	
Detection range (mm)	0-3000	
Application	For press fitting	
Supplied with	1 motion detector with 2 m lead	

- ! > For Loox 12 and 24 V LED strip lights with 10 mm width in Loox aluminium profiles with 16 mm internal dimension
- > Automatic on/off
- > Detection range 0-3000 mm

### Cooling bar for leading heat away from 12 V and 24 V LED strip lights

Cat. No.	833.77.700
Finish	Aluminium
Length (mm)	1000
Width (mm)	10
Height (mm)	2
Application	For surface mounting
Supplied with	1 profile

- ! > Only suitable for 10 mm wide LED strip lights
- > For screw fixing, drill holes at 250 mm, 500 mm and 750 mm

## DIFFUSER AND CABLE COVERS

### Diffuser cover

<b>Cat. No.</b>	<b>833.74.794</b>
Finish	Plastic
version	Milky
Length (mm)	2500
Application	For recess mounting
Supplied with	1 profile

- > Only suitable for 12 V LED strip lights
- > For recess mounting

Diffuser	Size A min., so that LED points are not visible			
	LED 2029	2037	2043	2045
Milky	10 mm	10 mm	10 mm	13 mm

### Cable cover

<b>Cat. No.</b>	<b>833.74.795</b>	<b>833.74.796</b>	<b>833.74.797</b>
Finish	Plastic		
Colour	White (RAL 9010)	Beige (RAL 1001)	Black (RAL 9005)
Length (mm)	2500		
Application	For recess mounting		
Supplied with	1 profile		

- > For concealing visible cables in furniture and cabinets
- > For recess mounting

### Replacement diffuser

Milky

Frosted

<b>Cat. No.</b>	<b>833.74.780</b>	<b>833.74.781</b>
Finish	Plastic	
Cover	Frosted	Milky
Length (mm)	2500	2500
Supplied with	1 diffuser	

- > Simple replacement of existing diffusers in order to switch from frosted to milky
- > Cannot be used for the following aluminium profiles: 833.74.812, 833.74.813, 833.74.814

# LOOX ACCESSORIES

## MODULAR SWITCHES

### Sensor switch, modular – touch-free on/off switching

TOUCH-FREE

Cat. No.	833.89.095
Drill hole Ø (mm)	12
Length (mm)	47.3
Sensor range (mm)	0–80
Finish	Plastic, silver coloured
Supplied with	1 switch

> Please order lead for modular switch to Loox driver separately.

### Door sensor switch, modular

Cat. No.	833.89.094
Drill hole Ø (mm)	12
Length (mm)	47.3
Power consumption (W)	1
Sensor range (mm)	3–80
Finish	Plastic, silver coloured
Supplied with	1 switch

> Use motion detector for sliding doors.  
> Please order lead for modular switch to Loox driver separately.

### Motion detector, modular – automatic on/off switching

Cat. No.	833.89.093
Drill hole Ø (mm)	12
Length (mm)	57.3
Power consumption (W)	1
Sensor range (mm)	0–3000
Delay time (seconds)	approx. 30
Finish	Plastic, silver coloured
Supplied with	1 motion detector

> Please order lead for modular switch to Loox driver separately.

### Dimmer, modular

TOUCH-FREE

Cat. No.	833.89.096
Drill hole Ø (mm)	12
Length (mm)	47.3
Power consumption (W)	1
Sensor range (mm)	0–80
Finish	Plastic, silver coloured
Supplied with	1 dimmer

> Cannot be used in combination with multi switch box  
> Dimming value is stored without the need for power supply (memory function)  
> Please order lead for modular switch to Loox driver separately.

## Capacitive switch/dimmer, modular

This completely invisible operating solution opens up completely new possibilities in continuously adjustable light control.

<b>Cat. No.</b>	<b>833.89.087</b>
Ø (mm)	35
Height (mm)	9
Finish	Plastic, silver coloured
Supplied with	1 switch

- > Works by touch
- > Concealed installation in wood, glass or stone (not in metalliferous materials) at a maximum depth of 30 mm
- > For screw fixing or recess mounting (drill hole Ø 35 mm)
- > Please order lead for modular switch to Loox driver separately.

## Universal door contact switch, modular

The universal door contact switch is suitable for hinged or single-leaf sliding doors.

<b>Cat. No.</b>	<b>833.89.065</b>
Length (mm)	51.8
Width (mm)	40
Height (mm)	14.2
Finish	Plastic, black
Supplied with	1 switch

- > Please order lead for modular switch to Loox driver separately.

## Door contact switch

<b>Cat. No.</b>	<b>Door contact switch</b>	<b>Housing for switch</b>
	<b>833.89.045</b>	<b>833.89.048</b>
Drill hole Ø (mm)	13	-
Ø (mm)	-	16
Length (mm)	28	57
Width (mm)	-	50
Height (mm)	-	20
Finish	Plastic, black	
Supplied with	1 switch with 2 m lead	1 housing for switch Ø 13 mm

- > Drill hole 13 mm

## Lead for modular switch

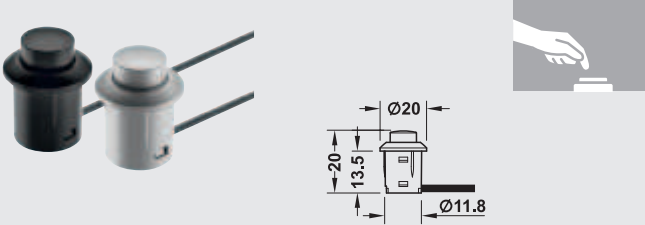

<b>Cat. No.</b>	<b>833.89.054</b>	<b>833.89.055</b>	<b>833.89.056</b>
Length (mm)	500	1000	2000
Supplied with	1 lead		

# LOOX ACCESSORIES

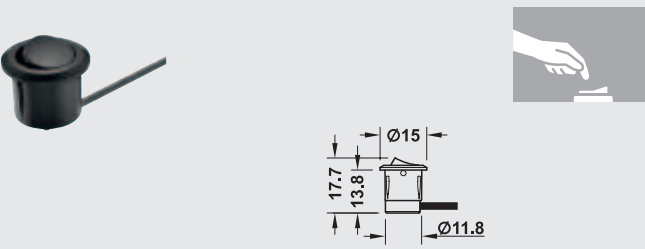

## SWITCHES

### Push switch

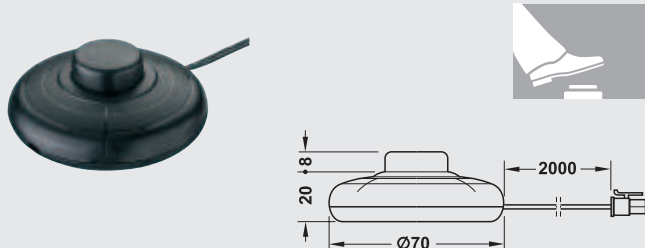

Cat. No.	833.89.108	833.89.107
Drill hole Ø (mm)	12	12
Length (mm)	20	20
Finish	Plastic, black	Plastic, grey
Supplied with	1 switch with 2 m lead	

### Rocker switch

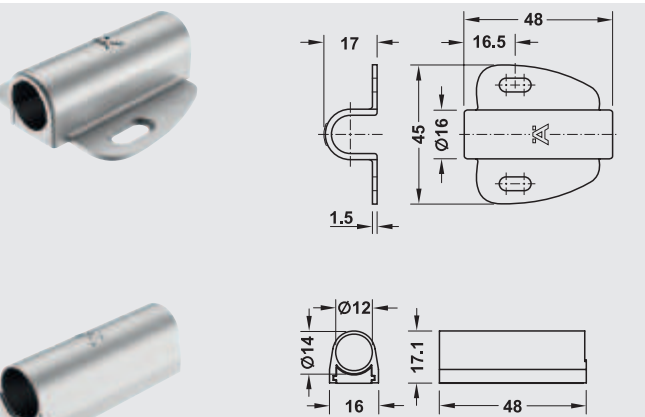

Cat. No.	833.89.106
Ø (mm)	15
Drill hole Ø (mm)	12
Height (mm)	17.7
Finish	Plastic, black
Supplied with	1 switch with 2 m lead

### Foot switch

Cat. No.	833.89.046
Ø (mm)	70
Height (mm)	28
Finish	Plastic, black
Supplied with	1 switch with 2 m lead

### Housing for switch, for surface mounting

Cat. No.	833.89.090	833.89.092
Ø (mm)	16	14
Length (mm)	48	48
Width (mm)	45	16
Height (mm)	17	17.1
Finish	Plastic, silver coloured	
Supplied with	1 housing	1 housing
Application	For switch Ø 12 mm	

**!** > Suitable for 32 mm series drilled holes

## RADIO RECEIVERS, RADIO REMOTE CONTROLS AND RADIO SWITCHES

### Premium 6-channel radio receiver

White LED lights can be remote controlled with this system. The Premium version consists of a radio receiver and a 6-channel remote control. Three lighting scenarios can be stored. Radio switches can be added that are compatible with both the 12 V and the 24 V system.

Cat. No.	833.73.741	833.77.785
Application	12 V system	24 V system
Wattage (W)	60	120
Max. wattage per slot (W)	30	60
Number of slots	6 slots for consumers, power supply from driver via 2 leads	
Supplied with	1 Premium radio receiver	

- ! > For controlling white LED lights
- ! > Not suitable for multi white or RGB
- ! > max. 10 radio receivers can be combined

- ! > For controlling Loox 6-channel radio receivers for white LEDs
- ! > Soft on/off with dimming function for 6 channels
- ! > 3 lighting scenarios can be stored
- ! > Several radio receivers can be controlled within a radius of 15 m

Cat. No.	833.89.121
Application	12 V and 24 system
Supplied with	1 Premium radio remote control

### Basic 4-channel radio receiver

White LED lights can be remote controlled with this system. The Basic version consists of a radio receiver and a 4-channel remote control. Radio switches can be added that are compatible with both the 12 V and the 24 V system.

Cat. No.	833.73.740	833.77.784
Application	12 V system	24 V system
Wattage (W)	30	60
Max. wattage per slot (W)	30	60
Number of slots	4 slots for consumers, power supply from driver via 1 lead	
Supplied with	1 Basic radio receiver	

- ! > For controlling white LED lights
- ! > Not suitable for mult white or RGB
- ! > max. 10 radio receivers can be combined

- ! > For controlling Loox 4-channel radio receivers for white LEDs
- ! > Soft on/off with dimming function for 4 channels
- ! > Several radio receivers can be controlled within a radius of 15 m

Cat. No.	833.89.120
Application	12 V and 24 system
Supplied with	1 Basic radio remote control

### Radio switch 12 V/24 V

- ! > For controlling all channels or one channel of Loox radio receiver for white LEDs
- ! > Soft on/off
- ! > Several radio receivers can be controlled within a radius of 15 m

- +  > Housing for surface mounting, round for screw fixing  
Cat. No. 833.89.123

Cat. No.	833.89.122
Drill hole Ø (mm)	40
Height (mm)	14.4
Application	For recess mounting
Supplied with	1 radio switch

# LOOX

## THE SYSTEM COMPONENTS

Based on the plug and play driver, you can customise the system in accordance with your requirements using add-on modules. The flexible and modular system components make it possible to have a wide range of applications and solutions, simplify installation or provide meaningful combinations of different lights and switches.

### THE MOST IMPORTANT COMPONENTS OF THE LOOX SYSTEM

**Dimmer interface 1 – 10 V**  
 With the dimmer interface you can conveniently also dim Loox lights in furniture together using a wall switch.

12 V 24 V

**Multi switch box**  
 1 LED driver operated by up to 3 switches. Allows the LED driver to be switched on and off from different positions.

12 V 24 V 350 mA

**Multi driver box**  
 Up to 3 LED drivers can be controlled with 1 switch. Several drivers and therefore several lights in the room can be switched on and off with one switch. These can also be 3 of the same driver if you require additional power in a 12 V system, for example.

12 V 24 V 350 mA

**USB converter**  
 The USB converter is intended for direct installation in the furniture. It can charge up to two tablets or smartphones simultaneously, and therefore provides additional functionality in the living area and stores.

12 V

**4-way extension lead (Daisy Chain cable)**  
 4 LED lights can be connected with a single lead from an LED output using the 4-way extension.

12 V 24 V

# LOOX

## THE SYSTEM COMPONENTS

Based on the plug and play driver, you can customise the system in accordance with your requirements using add-on modules. The flexible and modular system components make it possible to have a wide range of applications and solutions, simplify installation or provide meaningful combinations of different lights and switches.

### THE MOST IMPORTANT COMPONENTS OF THE LOOX SYSTEM

#### Dimmer interface 1 – 10 V

With the dimmer interface you can conveniently also dim Loox lights in furniture together using a wall switch.

12 V 24 V

#### Multi switch box

1 LED driver operated by up to 3 switches. Allows the LED driver to be switched on and off from different positions.

12 V 24 V 350 mA

#### Multi driver box

Up to 3 LED drivers can be controlled with 1 switch. Several drivers and therefore several lights in the room can be switched on and off with one switch. These can also be 3 of the same driver if you require additional power in a 12 V system, for example.

12 V 24 V 350 mA

#### USB converter

The USB converter is intended for direct installation in the furniture. It can charge up to two tablets or smartphones simultaneously, and therefore provides additional functionality in the living area and stores.

12 V

#### 4-way extension lead (Daisy Chain cable)

4 LED lights can be connected with a single lead from an LED output using the 4-way extension.

12 V 24 V

### 6-way distributor

Connect the 6-way distributor to an LED light output and you will be able to operate 6 additional lights using the driver.

12 V 24 V

### 3-way distributor with switching function

The relevant lights can be operated separately and individually using the 3-way distributor with switching function connected to the output of the light.

12 V 24 V

### Converter 24 V to 12 V

Combine 24 V lights with 12 V lights and operate them using a single 12 V driver.

24 V → 12 V

### Converter 350 mA to 12 V

Combine 350 mA lights with 12 V lights and operate them using a single 12 V driver.

350 mA → 12 V

### Converter 12 V to 24 V

Combine 12 V lights with 24 V lights and operate them using a single 24 V driver.

12 V → 24 V

# LOOX ACCESSORIES

## SWITCH ACCESSORIES

### Dimmer interface 1–10 V, modular – for 12 V and 24 V systems

With the dimmer interface you can conveniently also dim Loox lights in furniture together using a wall switch. The modular design makes installation easier.

<b>Cat. No.</b>	<b>833.89.086</b>
Length (mm)	60.4
Width (mm)	34.2
Height (mm)	13.5
Supplied with	1 dimmer interface

Direct connection to a normal household dimmer with a 1–10 V control output and connection via a lead for modular switches to the switch input of a Loox driver 12 V or 24 V.

- > Please order lead for modular switch to Loox driver separately
- > Cannot be combined with multi switch box

- Lead for modular switches
- > 500 mm, Cat. No. 833.89.054
  - > 1000 mm, Cat. No. 833.89.055
  - > 2000 mm, Cat. No. 833.89.056

### Multi switch box and leads

Cat. No.	833.89.060	833.89.064
<b>Multi switch box</b>		
Length (mm)	50	50
Width (mm)	40	40
Height (mm)	19	19
Finish	Plastic, black	Plastic, black
Standby power consumption (W)	1.5	
Function	without change-over switch	with change-over switch
Supplied with	1 Multi driver box with 1 m lead	

1 LED driver operated by up to 3 switches. Allows the LED driver to be switched on and off from different points.

- > A dimmer cannot be used in combination with the multi switch box.
- > max. 75 W per multi switch box.

Cat. No.	833.89.068	833.89.069
<b>Lead for switch – as connecting cable to switch input of the driver</b>		
Length (mm)	500	2000
Supplied with	1 lead	1 lead

- > Alternative to the supplied 1 m lead for multi switch box.

### Extension lead for switches

Cat. No.	833.89.067
Length (mm)	2000
Supplied with	1 lead

- > Can also be used for the multi switch box and the multi driver box.
- > Lead length from driver to switch max. 6 m
- > The drill hole Ø for the male plug and the female socket of the switch leads is 12 mm.

# LOOX ACCESSORIES

## MULTI DRIVER BOX AND USB CHARGING STATION

### Multi driver box and leads

<b>Cat. No.</b>	<b>833.89.061</b>
<b>Multi driver box</b>	
Length (mm)	50
Width (mm)	40
Height (mm)	19
Standby power consumption (W)	1.5 W
Finish	Plastic, black
Supplied with	1 multi driver box with 3 x 1 m lead

- > Up to 3 LED drivers can be controlled with 1 switch. Several drivers and therefore several lights in the room can be switched on and off with one switch.  
These can also be 3 of the same driver if you require additional power in a 12 V system, for example.
- > max. 3 x 75 W per multi driver box

<b>Cat. No.</b>	<b>833.89.068</b>	<b>833.89.069</b>
<b>Lead for switch – as connecting cable to switch input of the driver</b>		
Length (mm)	500	2000
Supplied with	1 lead	1 lead

- > Alternative to the supplied three 1 m leads for multi driver box.
- > The drill hole Ø for the male plug and the female socket of the switch leads is 12 mm.

### USB converter, modular – for 12 V system

The USB converter is intended for direct installation in the furniture. It can charge up to two tablets or smartphones simultaneously, and therefore provides additional functionality in the living area and stores. The cover ring can be removed.

<b>Cat. No.</b>	<b>833.74.876</b>
Finish	Plastic, matt, black
Installation	For mounting in drilled hole, with clip fastener
Output voltage	5 V
Output current	2 A
Power consumption	max. 15 W
Supplied with	1 USB charging station

- > Drill hole Ø: 35 mm
- > Installation: For mounting in drilled hole, with clip fastener
- > Power consumption max. 15 W

- Lead**
- > 500 mm Cat. No. 833.72.128
  - > 1000 mm Cat. No. 833.72.129
  - > 2000 mm Cat. No. 833.72.123

- > Please order lead separately.

# LOOX ACCESSORIES

## LEADS AND DISTRIBUTORS

### Extension leads 12 V / 24 V / 350 mA

Length (mm)	500	1000	2000
12 V system	833.74.724	833.74.725	833.74.726
24 V system	833.77.706	833.77.707	833.77.708
350 mA system	833.80.704	833.80.705	833.80.706
Supplied with	1 lead		

For extending the connection leads of the LED lights

> Lead length from driver to light max. 6 m

### 4-way extension lead – convenient extension for additional lights

Cat. No.	833.74.765	833.77.800
Length (mm)	6500	6500
Application	12 V system	24 V system
Finish	Plastic, black	
Supplied with	1 lead	

Makes the power supply for multiple lights easier.

> max. 4 lights per extension can be connected,  
max. 2 extensions can be coupled

### 6-way distributor – for connecting additional lights to one driver

Cat. No.	833.74.743	833.77.722
Application	12 V system	24 V system
Finish	Plastic, black	
Dim. (L x W x H) mm	58.5 x 38.2 x 10.2	58.5 x 38.2 x 10.2
Supplied with	1 distributor with 2 m mains lead	

With the 6-way distributor, up to 6 additional lights can be operated from one driver slot.

### 3-way distributor with switching function 12 V / 24 V

Cat. No.	833.74.742	833.77.720
Application	12 V system	24 V system
Power consumption	0.1 W	0.1 W
Dim. (L x W x H) mm	57 x 34 x 18	57 x 34 x 18
Wattage	max. 30 W	max. 60 W
Supplied with	1 distributor with 2 m mains lead	

Up to 3 lights can be operated separately and individually using the 3-way distributor with switching function connected to the output of the light.

### Converter 24 V to 12 V – for connecting 24 V lights to the 12 V system

<b>Cat. No.</b>	<b>833.77.934</b>
Application	Connecting 24 V lights to the 12 V system
Power consumption	15 W
Standby power consumption	0.3 W
Primary side	DC 12 V
Secondary side	DC 24 V
Number of output ports	3 connections for 24 V lights
Dimensions (L x W x H)	60.5 x 34.2 x 14.6 mm
Supplied with	1 converter with 1 m lead

- ! > Combine 24 V lights with 12 V lights and operate them using a single 12 V driver. max. 10 W per converter

### Converter 350 mA to 12 V – for connecting 350 mA lights to the 12 V

<b>Cat. No.</b>	<b>833.80.912</b>
Application	Connecting 350 mA lights to the 12 V system
Power consumption	3.5 W
Primary side	DC 12 V
Secondary side	DC 350 mA (min. 1 W, max. 9 W)
Number of output ports	3 connections for 350 mA lights
Dimensions (L x W x H)	61 x 34 x 15 mm
Supplied with	1 converter with 1 m lead

- ! > Combine 350 mA lights with 12 V lights and operate them using a single 12 V driver. max 9 W per converter
- + > Cable bridge (alternative); 1 piece Cat. No. 833.80.720

### Converter 12 V to 24 V – for connecting 12 V lights to the 12 V system

<b>Cat. No.</b>	<b>833.74.947</b>
Application	Connecting 12 V lights to the 24 V system
Power consumption	15 W
Standby power consumption	0.3 W
Primary side	DC 24 V
Secondary side	DC 12 V
Number of output ports	3 connections for 12 V lights
Dimensions (L x W x H)	60.5 x 34.2 x 14.6 mm
Supplied with	1 converter with 1 m lead

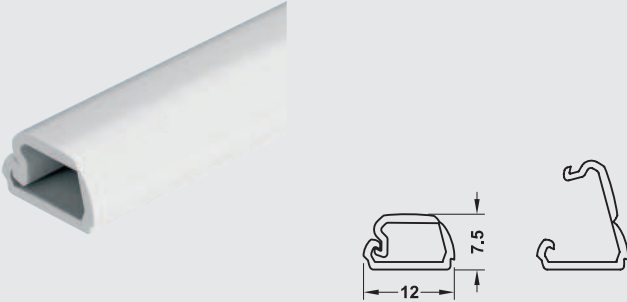

- ! > Combine 12 V lights with 24 V lights and operate them using a single 24 V driver. max. 10 W per converter

# INFORMATION

## LIGHTING EFFECTS AND LIGHTING TECHNOLOGY

### Cone of light

		Refraction angle	
Colour temperature	3000 K	45°	Distance
Illuminance	650 lx		250 mm
	209 lx		500 mm
	104 lx		750 mm
	60 lx		1000 mm

### Light source comparison

			
	<b>LED</b>	<b>Halogen bulb</b>	<b>Fluorescent light</b>
<b>Colour temperature</b>	2700–6500 K	2800-3100 K	2700–6500 K
<b>Power consumption</b>	0.5–6 Watt	5-50 Watt	7-58 Watt
<b>Luminous efficacy</b>	up to 140 lm/W	12–25 lm/W	45-100 lm/W
<b>Service life</b>	up to 50,000 hrs. (L70, i.e. no complete failure)	2000–5000 hrs.	8000-24000 hrs.
<b>Heat generation</b>	approx. 50 °C	approx. 90 °C	approx. 70 °C
<b>Colour rendering index (CRI)</b>	80–95	100	50-90

L70 means that the LED is only emitting 70 % of the original light.

### Luminous efficacy comparison

	Light quantity						
	200 lm	400 lm	600 lm	800 lm	1000 lm	1200 lm	1400 lm
<b>LED</b>	2 Watt 	5 Watt 			10 Watt 		15 Watt 
<b>Fluorescent light</b>		8 Watt 		14 Watt 	16 Watt 		
<b>Halogen bulb</b>	10 Watt 	20 Watt 	35 Watt 	50 Watt 			
<b>Incandescent bulb</b>	25 Watt 	40 Watt 	60 Watt 	75 Watt 			100 Watt 

# SYMBOLS AND TERMS

## TEST SYMBOLS AND DEFINITION OF TECHNICAL TERMS

	TÜV seal of quality		Restriction of Hazardous Substances (EU directive 2011/65/EU)		Do not use components that impede thermal radiation
	Confirmation from manufacturer that the product complies with the product-specific applicable European directives.		Protection class II	<b>K</b>	Kelvin
	Underwriters Laboratories correspondence with the national standards in the USA and Canada.		Protection class III	<b>W</b>	Watt
	Product Safety Electrical Appliance and Material Safety Law (for Japan)	<b>SELV</b>	Safety Extra Low Voltage	<b>T<sub>A</sub></b>	Ambient temperature
	Regulatory Compliance Mark (for Australia)	<b>IP20</b>	Only for use in dry locations	<b>f</b>	Frequency
	China Compulsory Certification	<b>IP44</b>	Penetration by solid foreign bodies $\geq 1$ mm $\varnothing$ is prevented. Water spray protection (water from all directions)		Switches
	Korea Certification Mark	<b>IP65</b>	Dust-tight, protection from water spray (jet) from any angle.		Driver
	Bureau of Standards, Metrology & Inspection BSMI (for Taiwan)		IP44 after installation		Dimmable
	Thai Industrial Standards Institute TISI		IP65 after installation		Motion detector
			Furniture installation symbol		RGB light
			Lights to be used indoors only. Not to be used outdoors!		Multi white light

Technical terms	
<b>Luminous intensity</b>	The luminous intensity indicates the light output, i.e. the quantity of light a source emits. It is indicated in Lumen (lm).
<b>Luminous efficacy</b>	The luminous efficacy is the ratio of the luminous intensity and the wattage absorbed (lm/W) and is used to measure the operating efficiency of the light source.
<b>Illuminance</b>	The illuminance is the luminous intensity in relation to a surface and it is indicated in Lux ( $lx = lm/m^2$ ). It is used to measure the brightness with which a surface is illuminated.
<b>Refraction angle</b>	The refraction angle (beam angle) describes the angle between two imagined straight lines in a plane through the optical beam axis, whereby these straight lines go through the centre of the front of the lamp and through the points at which the illuminance is 50% of the illuminance on the optical beam axis.
<b>Colour temperature</b>	The colour temperature is a specification of the colour appearance of a white light source and is measured in Kelvin (K). The lower the colour temperature, the warmer the light; the higher the colour temperature, the cooler the light. White light sources with a colour temperature below 3400 K are considered "warm white", white light sources with a colour temperature between 3400 and 5700 K are considered "cool white". White light sources above 5700 K are referred to as "daylight white".
<b>Colour binning</b>	LEDs are sorted according to colour. LED colour deviations are dependent on the grade of binning. The LEDs used in Loox lights have a deviation of $\pm 200$ K.
<b>Colour rendering index (CRI)</b>	The colour rendering index is a parameter that can be used to compare the colour rendering quality of light sources at the same colour temperature. The higher the value, the better the colour rendering. A value of 100 corresponds to the colour rendering of daylight.
<b>Energy efficiency category</b>	The energy efficiency category provides information about the relevant energy consumption. Lamps and lights are categorised in classes E to A++. LED lights achieve the highest classes A to A++.
<b>Weighted energy consumption</b>	The weighted energy consumption shows the energy consumption in kilowatt hours in relation to 1,000 hours of use.

# LED LIGHTING TECHNOLOGY

LEDs (Light Emitting Diodes) can vary the properties of the light that is generated, and generate almost the entire colour spectrum. Unlike normal light bulbs and halogen lamps, LEDs generate little heat. They use less energy and have a long service life.

## THE ADVANTAGES:

- > **Long lasting**  
LED lights have an extremely long service life of up to 25 years or more than 40,000 to 50,000 hours.
- > **Insensitive**  
LEDs have an extremely small and robust design. This makes handling easier during furniture construction and transport.
- > **Low heat generation**  
Because of their extremely low power consumption, LED lights generate hardly any heat. This means that LED lighting systems are particularly suitable for displays.
- > **Energy-saving**  
LED lights use an impressive 90 percent less power than conventional light bulbs! This means that they can be used to implement modern lighting scenarios in furniture, and still be in line with the energy saving trend.
- > **Powerful**  
Modern LED lights are bright and have a saturated light colour. They achieve full brightness as soon as they are switched on. LED furniture lighting therefore has a lasting effect at the push of a button.
- > **Rich in variants**  
LED lights are available in different colours, and can also be designed as colour changing lights. This allows the colour temperature to be coordinated with furniture contents such as exhibits in the best possible way.

## THE LOOX LIGHTING TECHNOLOGY

The Loox LED technology incorporates different power systems. A system is decided on by choosing the driver or a particular light. The choice of system is an important decision, because the driver that is selected can only be combined with lights from the same system.

**12 V System** **Spoiled for choice in the 12 V system**  
The LED lights are voltage-controlled and connected in parallel in the 12 V system. The slots on the driver can be freely allocated. 12 V lights are among the most widespread at present.

**24 V System** **Powerful 24 V system**  
Technically speaking, the 24 V system is identical to the 12 V system, but has a considerably higher power level. 24 V lights can therefore be used when extremely bright lights are required.

**350 mA System** **Spotlights in the 350 mA system**  
The LED lights in the 350 mA system are current-controlled and connected in series. This means that each slot has to be either occupied or must have a bridge. 350 mA lights provide extremely great light output and are particularly suitable for spotlighting.

## SWITCHING

Parallel connection for 12 V and 24 systems

Series connection for 350 mA system

# LED FLEXIBLE STRIP LIGHT

## QUALITY FEATURES

### How to recognize our quality:

#### Light emitting diode (LED):

- > Use of extremely bright high-power LEDs for the best light quality
- > Low light colour tolerance – subsequent purchases have the same colour
- > After 30,000 hours the LEDs still have at least 70% of the light output (ambient temperature  $\leq 35$  °C)

#### Structure of strip light:

- > Multi-layer for transporting high currents with little heat development
- > Flexible copper alloy for avoiding broken conductor tracks
- > Gold-plated contacts for a permanently reliable, corrosion-free contact
- > White top coat with UV coating to prevent corrosion and yellowing, for permanent aesthetics
- > Reflective white top coat – for better light yield
- > The rear 3M® adhesive tape provides secure adhesion to practically any surface
- > Strip lights can be individually shortened, extended and are also flexible due to clip and corner connectors

### Can be individually combined with:

- Profiles (see page 110)
- Switches (see page 118)
- Distributors (see page 126)

TEST THE LOOX  
PLANNING SERVICE

## Glossary

### LED

A light-emitting diode (LED) is a semi-conductor element that emits light when electricity passes through it. This semi-conductor element consists of a crystal that is attached to a metal holder, and are both encapsulated in protective plastic. LEDs are mostly based on inorganic, i.e. non-carbonic materials.

### OLED

Organic light-emitting diodes (OLEDs) are based upon organic (carbonic) materials. OLEDs are manufactured in thin layers and therefore provide a diffuse light source. The OLED technology is becoming more frequently used in display applications (e.g. mobile phones and PDA screens).

### Service life of an LED L70

Up to 50,000 hours. L70 is the time after which the LED is still emitting 70% of its original light.

### Infrared radiation from LEDs

LEDs do not emit infrared radiation like incandescent bulbs do.

### Heat generation of LEDs

All light sources produce heat, even LEDs. However, they do not become very hot, especially if the LEDs and lights are fitted with "heat sinks", they help to lead away heat.

### Test of service life in accordance with the LM-80 standard

Häfele tests all LEDs it uses in accordance with the LM-80 standard. LM-80 is a standardised testing method, which allows products to bear the EPA's (Environmental Protection Agency) Energy Star. The test is a manufacturer-independent comparison of LEDs. During the test the luminous flux (Lumen maintenance) of an LED is tested at three different temperatures (55, 85, and 105 °C) for 6,000 hours. Then the life span L70 is calculated by means of extrapolation. The extrapolation procedure is described in regulation IES TM-21.

### Lead in Loox products

Loox Products by Häfele are lead-free and adhere to the RoHS guidelines.

# FAQ

## QUESTIONS AND ANSWERS

### Technical questions about Loox

#### What has a major effect on the service life of drivers and LEDs?

An ambient temperature and/or voltage that is too high.

#### How long should the lead of an LED light / LED flexible strip light be?

6 metres, as with a longer lead the resistance drops and the specified light intensity can no longer be guaranteed.

#### What is the service life of the drivers?

At least 30,000 hours at a max. ambient temperature of 45°C.

#### Can an LED flexible strip light be used behind acrylic glass?

Yes, however the acrylic glass increases the colour variations (binning) up to four times and minimal colour deviations are therefore more visible.

#### Can the multi switch box, the multi driver box and the 3-way distributor with switching function be connected in series multiple times?

No, because the signals can no longer be transmitted properly.

#### With what output tolerance should drivers and LED lights be calculated?

±10 per cent

#### Can 12 V and 350 mA lights or 12 V and 24 V lights be used together?

Yes, please use our respective converter (converter see page 123).

#### Which ambient variables can lead to problems when using the door sensor switch?

High-gloss front panels and sliding doors. Solution: Please use motion detector.

#### Is it possible to control multiple colour mixers with a single remote control?

Yes, different colour mixers can be taught in on a single remote control.

#### Is the dimmer setting saved if the power fails?

The dimmer setting is saved for RGB/multi-white mixers, but the mixer has to have been connected to the mains for at least one minute.

## Technical questions about Loox

### For how many Amperes are the Loox LED plug systems suitable?

2.5 Amperes

### What is the maximum Wattage that I can connect to a light output on a driver?

With 12 V systems this is  $12\text{ V} \times 2.5\text{ A} = 30\text{ W}$ .  
 With 24 V systems this is  $24\text{ V} \times 2.5\text{ A} = 60\text{ W}$ .

### What is AWG 22?

AWG stands for American Wire Gauge.  
 It is the coding for wire diameters in electrical leads that are mainly used in North America. This identifies the cross-section of wires in electrical leads that consist of strands and wire.

### Can Loox lights be operated using multiple switches?

Yes, please use the multi switch box to do this. Up to three switches can be connected to the multi switch box. The dimmer does not work with the multi switch box (multi switch box see page 124).

### What is the difference between the different LED flexible strip lights?

Some flexible strip lights are sheathed in silicone, which means that no profiles are required for installation. These LED flexible strip lights can be directly installed in a groove or attached to a surface. Other flexible strip lights do not have silicone and it is advisable to use aluminium profiles for installation and heat management.

### What influence does the type of glass edge have on the lighting effect that is generated?

The lighting effect varies depending on the type of glass shelf.  
 > Glass edge with satin finish = even light line  
 > Clear glass edge = point light

### Can I simply cut LED flexible strip lights to length?

Yes, LED flexible strip lights can be shortened at the mark with the scissor symbol.  
 Example of LED flexible strip light: Cut off, fit clip connector and press on – finished.

Can be shortened

Installation: Self-adhesive

Lead with clip connector

# FAQ

## QUESTIONS AND ANSWERS

### Why do the lights have to be plugged in first before connecting the high voltage mains plug?

If the driver is connected to the power first, electrical power is output at the secondary side, which leads to overvoltage and therefore damage to the lights if they are connected.

### Can Loox lights be used in RVs/boats?

Yes, but an upstream voltage stabiliser must always be installed, since voltage fluctuations occur in on-board power supplies and voltage peaks (even slight overvoltage) can reduce the service life of the lights considerably or cause damage.

### How can I compare the output of an LED light with a halogen light?

Use the cone of light and compare the values at 500 mm. A 20 W halogen light features approx. 600 lx at 500 mm.

## Troubleshooting

### Why does the light flash at regular intervals when it is switched off?

This is caused by leakage current in the electrical installation which is charging the capacitor in the driver until it briefly gives off the power at regular intervals to discharge itself and the light therefore briefly flashes.

**Solution:** Check the entire installation.

### Why does my LED light flash?

Flashing is a sign of (under or) overloading.

Use a driver with higher power or reduce the number of consumers.

### What may be the cause if an RGB LED flexible strip light is only displaying individual colours?

The clip connector has been connected the wrong way round or the strip has been connected to the wrong end or to the driver.

### Why is the door sensor switch not operating correctly?

When sliding doors are being used, the door sensor switch cannot record the movement of the door properly. Dark surfaces (e.g. jet black) have poor reflection. The optical sensor may therefore fail to detect the door panel.

**Solution:** Use motion detectors
