

**NEW**

## NEW UPPER HARDWARE **FAST S** (with spring regulation)

*CREATED TO MAKE A CARPENTER'S WORK EASIER*

We have perfected the well-known hardware FAST G and G Ram. New FAST S hardware is mounted to the door with two screws. The hardware is equipped in a regulation spring, that allows for precise door positioning and door wing adjustment.

**FAST S hardware have advantages, that will not be found in any competitive product:**

- \* **no extra wholes are needed while mounting the spring** (rival products require an extra mounting whole),
- \* **a special flange enables maximal screw tightening without blocking the spring, what makes the correct mounting quick** (in rival products the screw is advised not to be tightened maximally),
- \* **the range of the hardware is 10mm** (only 5mm in rival products).

FAST S hardware can be used with single rail L-050 or double track Gama 82090. FAST S Ram hardware can be used with single rail F-053 or double Rama 8850. The assembly manuals with dimensions for mounting are available on the website: <http://www.laguna.pl/do-pobrania/instrukcje-krok-po-kroku>

We highly recommend our products for their many advantages: originality, superior quality and a 5 year warranty.
